ABSTRACTED-PUB-NO: NL 6915500A

BASIC-ABSTRACT:

Synthetic tubular casings with a reinforcement of woven or nonwoven fabric, and formed as one unit or with a lengthwise seam, are impregnated and/or coated with a continuous polyvinyl alcohol film, this film being applied by precipitating a film-forming PVA with a degree of saponification of at least 20% on the fibres.

The process gives sausage casings consisting of a fibrous reinforcement coated and/or impregnated with PVA, this pref. being crosslinked. The casings have a high strength and low elongation when re-wetted. These casings are very suitable for use as sausage casings, and have a good permeability for moisture and smoke during prodn. of smoked sausages.
